

UNIVERSITY of NEW HAMPSHIRE

The Best of Both Worlds: Pursuing your associate degree on a university campus

Did you know that across the nation there are 11 two-year schools that exist on a University campus? One of them is right here in New Hampshire!

The **Thompson School of Applied Science** is the associate degree granting school of the University of New Hampshire. This arrangement is unique to UNH in our state, thus giving you many advantages not found in other two-year schools.

- 🐾 Living on the UNH campus in Durham.
- 🐾 Being a UNH student (a [WILDCAT](#)) – first and foremost.
- 🐾 Experiencing the full range of collegiate opportunities such as attending NCAA sporting events, theater, music, and other cultural events; participating in club sports and intramurals; being able to join one or several of the over 100 student organizations and clubs in areas of interest as diverse as the New Hampshire Outing Club and “knitting afghans for Afghans”; eating in award winning dining facilities.
- 🐾 Flexibility to take advantage of opportunities to take undergraduate courses from baccalaureate programs to progress towards your bachelor’s degree, if that is one of your goals. You may also be eligible to take courses that complement your Thompson School program.
- 🐾 Access to world-renown speakers and political leaders.
- 🐾 Being involved in a smaller learning environment while attending the state’s flagship institution – the University of New Hampshire.
- 🐾 Small class size and personal connections with our faculty.
- 🐾 Hands-on activities in each of the classes in your major.
- 🐾 Challenging and rigorous courses that are demanding and meaningful to your program of study.
- 🐾 A school with a great sense of community.
